

Installing the Fuse Jumper

1. Open and Expose the Passenger Footwell Fuse Panel.

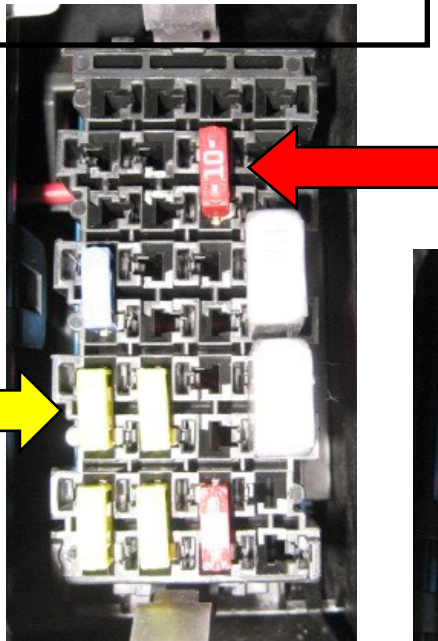

2. Using a small screwdriver, pry up and rotate the latch on the blue wire connector.

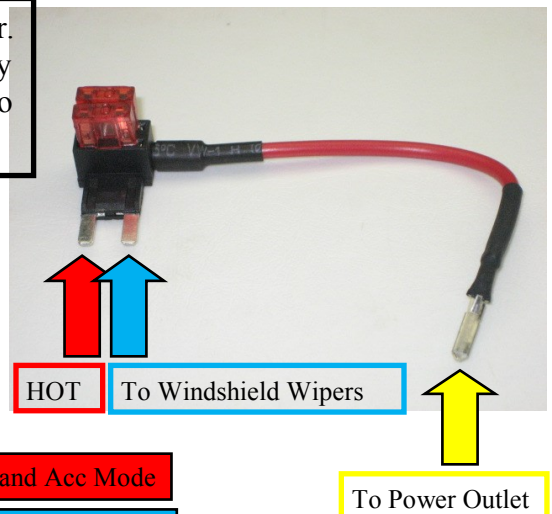

3. Remove the blue wire connector, then remove the black fuse box cover by pushing the latches away.

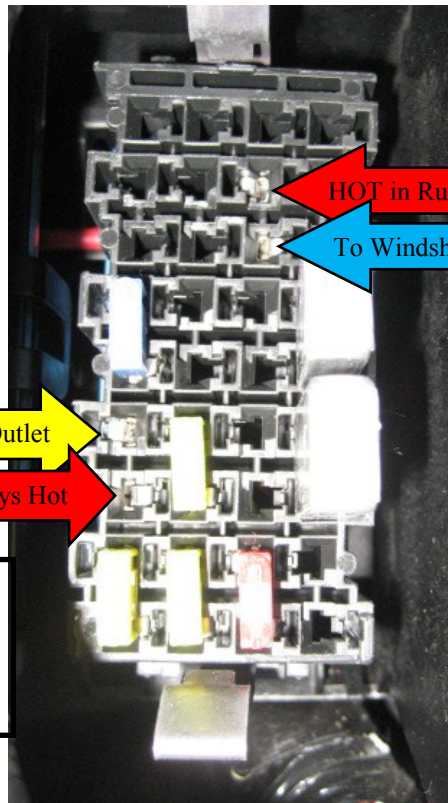

4. Remove the red 10 amp Windshield Wiper Fuse and the yellow 20 amp Power Outlet Fuse with the fuse puller.

6. Inspect the Fuse Jumper. The left terminal, shown by the red arrow, MUST go to the WSW HOT socket.

5. Look carefully at the four fuse sockets. We will NOT use the "Always Hot" Power Outlet fuse socket.

7. Install the Fuse Jumper
